## EXPERTISE

Microsoft Power Platform

Microsoft Fabric

Workflow Optimization

Reporting & Analytical Tools

Power BI / Tableau

Power Automate

Power Apps

Process Improvement

Azure SQL

Azure Data Factory

Azure Functions

REST APIs

ETL & Data Warehousing

## EDUCATION

MBA
University of Michigan
1992 – 1995

MASTER OF ARCHITECTURE
University of Michigan
1992 – 1995

BACHELOR'S DEGREE
Lawrence Tech. University
1992

## PROFESSIONAL EXPERIENCE

**INDEPENDENT CONTRACTOR / PRINCIPAL DATA ARCHITECT**
Raleigh, NC | Aug 2025 - Present

August 2025 – Present
Client: Regional nonprofit organization

- Architecting a unified Azure based platform to replace fragmented legacy tools across intake, distribution, scheduling, inventory, and reporting.
- Designed and configured a new Azure environment (Application Insights, Log Analytics, API Management, Function Apps, SQL Server, Storage Accounts, App Registrations).
- Implemented Microsoft Entra ID governance for user provisioning, RBAC, conditional access, and authentication for internal and external users.
- Built Azure Functions, SQL schemas, and Fabric pipelines, including a custom fuzzy matching search engine that accurately resolves international and multi part Hispanic names.
- Delivered delegation safe Power Apps components using typed schema patterns and a custom connector with a hand coded OpenAPI definition for secure, authenticated Function App access.

Sep 2025 – Dec 2025
Client: Enterprise organization via national staffing firm

- Supported finance teams during an M&A cycle by integrating acquired companies' financial and transactional data into the enterprise reporting ecosystem.
- Built PySpark-based ETL pipelines using REST APIs and Fabric Lakehouse to automate ingestion from Dynamics 365 Business Central and on-prem SQL Server (via gateway).
- Designed semantic models and authored DAX measures, M Query transformations, and Power BI dataflows to standardize reporting.
- Developed Power BI dashboards on top of Fabric semantic models, delivering user-friendly, visually polished reports that were well-received by finance leadership for their clarity and insight.
- Established schema governance, modeling standards, and Fabric workspace architecture to improve data quality, lineage, and scalability.

**BUSINESS INTELLIGENCE ARCHITECT**
CBRE, Inc. | 2018 – 2025

Managed and mentored a cross-functional team of BI professionals, including solutions developers, Power BI dashboard designers, and database managers, fostering a high-performance, collaborative culture.

- Led and mentored a cross-functional BI engineering team, fostering a collaborative, high-performance culture focused on scalable delivery.
- Introduced and championed Microsoft Power Platform capabilities (Power BI, Power Apps, Power Automate), expanding the team's automation, reporting, and app-development maturity.
- Architected and deployed a middleware integration platform using Azure Functions, REST APIs, and webhook ingestion, enabling real-time data exchange across SaaS systems and processing 1.8M+ automated triggers annually.
- Developed scalable ETL pipelines using Azure Data Factory, Power Automate, and Azure Data Lake Gen2, feeding a centralized Azure SQL data warehouse.

## PROFESSIONAL EXPERIENCE (CONTINUED)

**TECHNICAL SOLUTIONS LEAD**
CBRE, Inc. | 2015 - 2018

During this role, I became the go-to technical resource for our team, identifying opportunities to streamline operations through automation, data integration, and custom tooling.

- Developed custom applications using Microsoft Access, SharePoint, and VBA, integrating Excel and Outlook to automate workflows.
- Served as the de facto technical lead, building and maintaining internal tools to support project tracking, reporting, and communication.
- Partnered with account leadership to identify process-improvement opportunities and implement data-driven solutions that increased efficiency and reduced operational friction

**SENIOR PROJECT MANAGER**
CBRE, Inc. | 2012 – 2015

Oversaw a high-volume portfolio of quick-turn, small-scale projects and led a team of project managers.

Played a key role in the transition from a legacy, paper- and email-based system to a modern SaaS platform, significantly improving the team's ability to manage high-volume work efficiently. Trained employees, clients, and vendors on the new technology and quickly became a liaison to the SaaS development team, contributing to the enhancement of reporting capabilities and refinement of custom features.

**PROJECT MANAGER**
Salzeider, Inc. | 2007 - 2012

Managed all aspects of commercial construction projects, with a focus on quality delivery, client satisfaction, and operational efficiency, including project budgets, cost tracking, and financial reporting to ensure profitability and transparency.

## RELATED EXPERIENCE

Community Involvement
I collaborate with a regional nonprofit to modernize their operational systems, applying my data engineering and Power Platform experience to support a mission I care about. This partnership began in 2025 and continues alongside my consulting practice.

Volunteered my data-analytical skills to a local food pantry, creating dashboards used to help understand their client dataset. I revealed trends over time, showing the changing needs of clients by household income and geography
